EDUCATION

MSc Computer Science, St. Petersburg State University, Russia, 2003

Thesis title: Statistical Query Transformations for Question Answering in the Web

Summary: Evaluated the quality of query transformations for [question answering](#) using a state-of-the-art algorithm on a corpus of correct natural-language questions and developed an improvement for the algorithm achieving better quality.

EXPERIENCE

PhD student, assistant, University of Fribourg, Switzerland – *since April 2009*

- Working on a thesis on visualization of temporal changes in origin-destination data (e.g. migrations).
- Developing web-based [visualizations of AidData](#) (in progress).
- Developing [JFlowMap](#), an experimental tool for the visualization of spatial interactions.
- Contributing to the [BirdEye](#) visualization library developed at the UN Centre for Advanced Visual Analytics.
- Assisting in courses on [Web technologies](#) and [Functional programming](#). Tutoring, giving occasional lectures, preparing materials, building supporting websites and utilities.
- Technical maintenance of the [DIVA research group](#) website.
- Helping to organize and tutoring in workshops on programming and computer graphics for students and school children.

Senior Software Engineer, Technical team leader, IT department, University of Applied Sciences

FH Joanneum, Graz, Austria – *March 2007 - April 2009*

- Maintained and developed web applications used by the students, lecturers and employees of the university for the online administration.
- Maintained the web and database server infrastructure for the online administration.
- Designed and developed a web application for collaborative collection of study- and research-relevant data by the university employees and providing a statistical overview.

Software Engineer/Research Assistant, Dept of Information Design, University of Applied

Sciences FH Joanneum, Graz, Austria – *September 2005 - March 2007*

- Designed and developed [CGVis](#), a visualization tool facilitating hierarchical clustering, zooming and animation for the exploration of multidimensional datasets.
- Designed and developed a [standalone](#) and a [web](#) version of a proteomic data classification tool implementing a cancer diagnosis method based on mass-spectrometry data facilitating multi-step feature reduction and SVM classification. The tool achieves 99% classification accuracy on the NCI Cancer SELDI-TOF study dataset.
- Participated in the development of a [presentation management tool](#). Developed the visual layout editor (which allows users to arrange their multimedia objects on the screen) and the

schedule editor (similar to calendar in Outlook).

- Improved the implementation of an algorithm detecting the type of behaviour of a user looking at a web page (skimming, reading, searching, or learning) on the fly based on the real-time eye-tracking data. Implemented a real-time visualization of the web page reading process.
- Migrated the [AdeLE project web site](#) from static HTML to XML and XSLT using a self-developed Java XSLT-engine.

Software Engineer, Ecofinance Finanzsoftware & Consulting GmbH, Graz, Austria – June 2004 – August 2005

- Participated in the development of a web based treasury system for Deutsche Bahn and Commerzbank.
- Implemented the Java infrastructure and XSLT stylesheets for the runtime generation of the front end UI code from XML sources.
- Evaluated and optimized the performance of the XSL transformations.
- Implemented support for long running jobs on the server-side of the system.
- Developed the context-sensitive help for the system and the help authoring infrastructure based on DocBook.

Software Engineer, Elbrus MCST (by contract with Sun Microsystems), St. Petersburg, Russia – August 2003 - May 2004

- Worked in the Sun's Java Swing UI library maintenance team. Was responsible for fixing bugs and implementing requests for enhancements in the button classes (JButton, JRadioButton, JCheckBox, etc). Fixed a total of about 50 bugs.

Software Engineer, Aloha, St. Petersburg, Russia – January 2001 - July 2003 (during studies)

- Designed and developed an eCommerce system with user authentication and authorization, order tracking, credit card processing, back-office, inventory, statistical reports, etc. Developed the whole system from scratch, supported and customized it constantly adapting it to the changing needs of the employer. The system is still in use.

Web Developer, ALife, St. Petersburg, Russia – March 2000 - January 2001 (during studies)

- Participated in the development of a system of intelligent agents capable of chatting to visitors of a website in a natural language and promoting its products. Implemented a highly dynamic web-interface for the subsystem that controlled the chats and let operators intervene in a chat if a bot was in trouble.

Teacher, Anichkov Lyceum, St. Petersburg, Russia – September 1998 - April 2000 (during studies)

- Taught school children programming.

COMPUTER SKILLS

Languages #1: JavaScript, Java, CoffeeScript, PHP

Languages #2: Clojure, Scala, ActionScript, Perl, Python, C

Web: Node.js, jQuery, Spring, Wicket, Flex, HTML, SVG, XSLT

Visualization: D3, Tableau, Prefuse

GIS: Polymaps, OpenStreetMap, Google Maps API, QGIS, OpenJUMP

Databases: MySQL, PostgreSQL, MongoDB, SQL Server

OTHER ACTIVITIES

- Developed a [visualization of SBB train flows](#) in a team of several developers at the [Make Opendata Camp](#) in Zurich.
- Maintained the [web site](#) of the Russian Information Retrieval Evaluation Seminar with the use of a self-made Java XSLT-engine.
- Developed [phpObjectForms](#), an open-source library for building user-friendly web forms.
- Participated in developer conferences: JavaPolis, Devovx, Scala Days.

SPOKEN LANGUAGES

- Russian (mother tongue)
- English (fluent)
- German (fluent)
- French (intermediate)
